** Pago Pago on alternate calls, i.e. in sequence of Loop 2, Loop 1, Loop 3, Loop 2

Subject to prior mutual agreement in writing, the Parties may as the result of cargo availability change this port rotation and/or the number of vessels deployed as they may deem necessary or desirable from time to time. The changes to the port rotation and vessels deployed shall not require an amendment to this Agreement provided that any increase or decrease in the number of vessels deployed will be limited to one vessel.

5.2: The Vessels

The Service shall deploy three (3) vessels which will be Combi-Freighter 8000 DWT design or nominal 800 TEU minimum capacity based on 14 metric ton homogenous load per TEU with a service speed of 10 to 12 knots. The Parties may decrease or increase the size of the vessels deployed, but such changes shall not require an amendment to this Agreement.

5.3: Provision of Vessels

Initially, SSL shall provide one (1) vessel and Matson shall provide two (2) vessels. The Parties

shall discuss and mutually agree upon the timing, location, and other aspects of phasing-in and phasing-out of the Vessels to be deployed in the Service.

The Parties may also discuss and agree to the conditions upon which a Party may substitute a vessel for a Vessel deployed in the Service, provided that (i) any substitute Vessel shall satisfy the requirements of Article 5.2 hereof, and (ii) the substitute Vessel shall be phased-in at the same position in the cycle as the Vessel it replaces unless otherwise mutually agreed, and (iii) all additional costs including but not limited to transshipment and feeder expenses due to substitution of a Vessel by a Party shall be for the account of the Party substituting the Vessel. The Parties may establish other operational requirements for Vessel substitution as they shall deem appropriate.

The Parties may also consult and agree upon

- a) the number, type, and capacity of vessels to be operated by each of them in the Service,
- b) the allocation of space on vessels deployed in the Service, and
- c) the terms upon which each may charter additional slots to the other on vessels deployed in the Service,

provided that any change in the number of vessels deployed in the Service in excess of the increase or decrease of one vessel contemplated in Article 5.1 may only be accomplished by amendment to this Agreement filed with the U.S. Federal Maritime Commission ("FMC"). The Parties shall notify the FMC of any decrease or increase in the size of the vessels deployed, but such changes shall not require an amendment to this Agreement.

Each Party shall operate its own Vessels deployed in the Service, and shall pay for the fixed and variable costs associated therewith, including, but not limited to, daily running costs, charter hire, bunkers, port charges, dry docking, repairs and insurance.

5.4: Vessel Scheduling and Performance

From time to time the Parties will agree on sailing schedules for the Service based on a pro-forma schedule covering the voyage rotation set out in Article 5.1 hereof. Each Party shall maintain

the sailing schedule and shall use maximum efforts to remedy any failure to comply in accordance with the decisions taken by the Parties. The Parties may, from time to time, consult and mutually agree upon various other aspects of the Service including service frequency, ports (within the Trade) to be served, type and size of vessels to be deployed, the addition or withdrawal of vessels from the Service, and the terms and conditions of any such addition or withdrawal. Parties will from time to time agree on the financial and other implications of any failure to maintain the sailing schedule.

5.5: Space Allocation, Exchange and Chartering

5.5.1: The Parties are authorized to charter, exchange, or otherwise make available to each other space on their respective Vessels deployed in the Service on such terms and conditions as the Parties may agree from time to time.

Unless otherwise agreed by the Parties, space on each of the Vessels deployed in the Service shall be allocated between the Parties in proportion to each Party's total capacity contribution ratio and based on an average weight entitlement of 14.0 metric tons per TEU. All slots will be allocated on a used or not used basis. The Parties may from time to time review the agreed Capacity requirements of the Vessels.

5.5.2: For each voyage leg, Vessel Operator shall provide Container Operator the number of slots equivalent to their basic slot allocation. The basic slot allocation shall be distributed based on each Party's provision within the cycle and shall be pro-rated according to the capacity of the vessel deployed. Each Party shall be entitled to utilize any excess capacity on Vessels it operates in the Service.

5.5.3: In the event that the Container Operator fails to utilize its full basic slot allocation, the Vessel Operator may utilize any unused slots for its own account. If a Party does not intend to use its entire basic slot allocation, it may sell/subcharter slots within its basic slot allocation to any third party VOCC, provided that it has first offered those slots to the other Party at the agreed slot price and provided further that such subcharter shall be without prejudice to the Container

Operator's obligations to the Vessel Operator under this Agreement, and the Container Operator shall be liable to the Vessel Operator for all liabilities and damages that may result from such subcharter.

5.5.4: The Container Operator may request to load Containers in excess of its allocation or sub-allocation subject to the prior approval of, and subsequent coordination with, the Vessel Operator on such terms as the Parties may agree.

5.5.5: A Container Operator may carry break bulk, oversize, non-containerized and/or dangerous cargoes in the Service to the extent that such cargoes can be reasonably and safely transported on the vessels used in the Service but always subject to prior stowage approval by the Vessel Operator which will not unreasonably be withheld. Dangerous goods including, but not limited to goods which are of an inflammable, explosive, poisonous, radioactive, noxious or damaging nature cannot be shipped without the prior agreement of Vessel Operator and Container Operator shall comply with all notice requirements, as well as all applicable governmental and Coast Guard regulations, applicable to the carriage of such cargo.

5.6: Efficient Use of Equipment, Terminals, Stevedores, Ports and Suppliers

The Parties may establish pools of, or otherwise cooperate to interchange, their empty containers, chassis, and/or related equipment to provide for the efficient use of such equipment as between themselves, or with others on such terms as they may agree. The parties may agree on criteria for the selection of terminals to be used in the Service. Nothing herein shall authorize the Parties to jointly operate a marine terminal in the United States nor to jointly negotiate for or jointly procure terminal services at U.S. ports.

5.7: Liability

Prior to the start of the Service, the Parties shall agree on their respective liabilities with

respect to damage to cargo (including general average) and/or equipment, and the procedures to be followed in handling claims for such damage. Each Party shall be responsible for insurance on its vessels. The foregoing terms, conditions, and liabilities may be changed from time to time as the Parties may agree.

5.8: The Parties may discuss and agree on the vessels utilized under this Agreement, including the specifications, qualifications, and capabilities of such vessels, changes in vessels, vessel deployment and operation including, but not limited to, transit times, vessel speed, and changes in vessel speed (such as slow steaming), port rotations, port calls, scheduling, terminals to be used by each Party at various ports, and the factors to be considered in terminal selection, allocations of space and equipment, cost allocations, data collection and distribution, forecasting, recordkeeping, accounting and settlement, stevedoring, terminals and related services, responsibility for loss, damage or injury (including provisions of bills of lading), terms and conditions for force majeure relief, insurance, guarantees, indemnification, compliance with customs, safety, security (including participation in C-TPAT), requisition by flag nations, documentation, and regulatory requirements and other operational and administrative matters. The Parties may enter into further agreements with respect to routine operational and administrative matters to implement the terms of this Agreement. If there is a conflict between such agreements and this Agreement, this Agreement shall prevail.

5.10: The Parties may discuss and agree on their vessel contributions, including the specifications, qualifications and capabilities of such vessels, changes in vessels, vessel deployment and operation, port calls, scheduling, terminal use, allocations of space and

equipment, cost allocations, data collection and distribution, forecasting, recordkeeping, accounting and settlement, stevedoring, terminal and related services, responsibility for loss, damage or injury (including provisions of bills of lading), terms and conditions for force majeure relief, insurance, guarantees, indemnification, compliance with customs, safety, security, documentation, and regulatory requirements and other operational and administrative matters.
