As a big supporter of not only Trump but Kemp as well I have to say I'm dissatisfied not only are we still in a trade war with China where it's hitting small business like mine but now on a local level with these extra port and shipping charges to hurt us even more I would think I was living in a democratic state where they just want to control and squeeze every penny out of a business owner.
If this doesn't change my vote sure will!

Have a great day
